

Diamond Allegiance App Instructions:

The Diamond Allegiance app will be utilized for team communication, player profiles, and player development plans (CURVE). ***Messaging on the DA app will be active once everyone has registered on the DA app.***

To access your team schedule and payments, click on the Prime Sports Engine Login link on the DA App's home page under access benefits.

Diamond Allegiance App instructions: Please follow the steps below to download and log in to the app:

1. Download the ***Diamond Allegiance App*** from the App Store (see below for links to Apple or Google).
2. Click on the "Register" Button.
3. Enter the Organization Code: *Ask your head coach for the code*
4. Enter the required information for the player, including their name, phone number, and email address – all of which must be unique.

* If your player **does not** have an email, use the parent email, but enter the **player information**.

5. Enter the required information for one or two parents.
6. Validate your email(s).
7. Log in to the app and go through the intake screens.

Note: You cannot use the same email twice on one player account. There must be a separate email address for Player Email, Parent/Guardian 1 email and Parent/Guardian 2 email (Email 2 is optional). **Also, you must validate your email to receive messages.**

After you have completed the above steps, you will have access to the app. Please note that the **player account must log in first** and complete the intake screens before the parent account will have access. Once in the app, please be sure to update your performance metrics and take the assessment test located in the "Dev Plan" (CURVE) section. There is a video walkthrough of how to do these things in the app on the home screen. Once you have completed the assessment, you will unlock a daily training program specific to how your body moves to make improvements to your game.

***Please make sure you are aware of what is communicated in the Diamond Allegiance Chat. Chat should be used as a one-way communication. Coach to individual person (Direct Chat), Coach to entire team (Group chat). A parent or player cannot initiate a chat or a group. The DA chat is the only chat feature to be used.
